

JOSHUA RISK

It will deliver....

High quality intelligence - Intelligence feeds and map layers are all integrated into Joshua Risk and by using the advanced query tools and filters the data is easily tracked, displayed and shared.

Geo-spatial pattern analysis - Joshua Risk will map all your assets, people and travellers enabling you to visualise all your assets and map threats and incidents around them.

Preparedness - Joshua Risk will drive correct security postures reducing incident response and impact of events, ultimately saving time, money and lives.

Fast communication - Integrated communications and activity walls. Ability to set notification triggers to alert your teams to events near your assets. Getting the right information to the right people, at the right time.

Incident & case management - Ability for teams to manage, share, update, audit and track incidents, tasks, cases and investigations.

Flexible dashboards - Create multiple dashboard views and share with teams. All automated - anytime, anywhere.

Report builder - Automated and tailored intelligence reports. From flash alerts to tactical assessments, the report builder improves pace of reporting.

Battle-tested and secure - An established modular platform that can grow with your needs, enabling you to enjoy a fast pace of continuous improvement.

Totally Mobile, Totally Responsive.

Track, update and manage incidents and events on the go.

The app provides complete visibility, receives alerts, notifications and reports. Users can select their preferences within the application and be notified of intelligence that is of relevance to them.

Smart Features

Feature rich modules, underpinned by a powerful and intelligence core-engine.

THREAT INTELLIGENCE

Customisable Incident Management

Define alert triggers, proximity radius' and escalation

Visualise your assets, people and risks using geo-spatial mapping layers and tools

Communicate alerts, mass notifications and updates via text, email or in-App

Risk and incident scoring and profiling

Integrates with other data sources and systems

Map hierarchy and create groups for escalations and communication

Integrated case management and collaborative tools

Report builder to generate intelligence reports at the click of a button

Advanced filtering and data querying

Create custom dashboards and share with your teams

Mobile App supporting real-time alerting & viability of risk
